Creator of the wine cabinet

Wine, the last word in French heritage, stored in a wine cabinet manufactured in France, something we have committed to since we began in 1976.

In 1976, a handful of men created the first wine cabinet for storing wine, a completely innovative concept and source of national pride. Years later, Royale, the best wine cabinet in the world, the Holy Grail for wine lovers, is protecting and enhancing Romanée Conti, Hermitage, Château Margaux, Barolo, Screaming Eagle, Penfolds Grange and other fine wines.

EuroCave's history results from the desire to take care of wine in order to guarantee, by respecting the work of the wine producer, optimal wine drinking conditions.

A way of life

Entertaining, spending time around the table, enjoying food and wine, making the most of every moment... some examples that perfectly sum up the French way of life; social skills and etiquette which have guided us since we started.

Over the past few years, the wine cabinet has reinvented itself. Interiors have also changed, rooms are more open-plan, the kitchen has opened up to become a place in which we entertain...And naturally, the wine cabinet has found its place in this new approach. The focus is on sharing time around the table or at the bar, where we often have a glass of wine. The wine cabinet has therefore become a decorative object in its own right, with a stylish and elegant design.

At EuroCave, we are proud to have reconciled aesthetic requirements with storage performance, the very essence of a wine cabinet.

The Excellence of a French Manufacturer

Since its creation, EuroCave has embraced a unique vision of the wine cabinet – an exceptional product, precisely crafted, built to last, and entirely made in France.

This choice lies at the heart of our identity. It reflects our deep commitment to industrial heritage, to rare craftsmanship, and to the understated elegance of the French art of living. Producing in France means choosing excellence. It ensures complete control over every detail – from selecting materials to assembling each cabinet in our workshop in Fourmies, in the north of France.

Each product reflects our commitment to excellence, driven by a clear vision: to respect wine, enhance its ageing, and elevate the tasting experience.

Our distinctions

Since 1976, we have made a strong choice: to design and manufacture cellars in France, specifically created to preserve the most precious bottles.

A founding commitment, backed by expert craftsmanship and a strong belief in rare, demanding, local production.

The Living Heritage Company “Entreprise du Patrimoine Vivant” label, awarded by the state in 2021, recognises our expertise, developed and passed down through generations since we began.

In-store experience

Listening to the requirements of both professionals and fine food and wine lovers, being present in all places to make the connection between the wine producer and discerning customers, guaranteeing the quality of our products. These are the promises we endeavour to keep every day, thanks to our network of stores throughout the world.

Our world
Wine cabinet

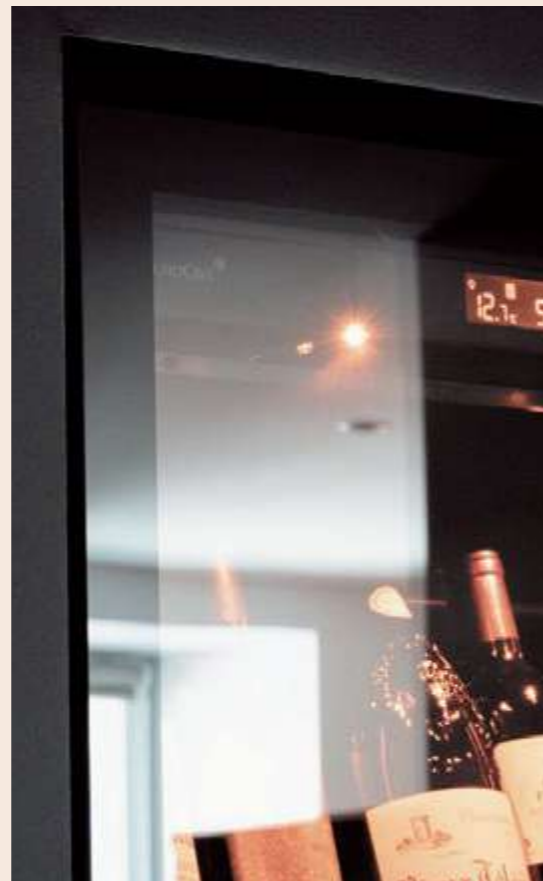

Object of desire, for all wine lovers.

Observing storage criteria and serving temperatures leaves no room for improvisation. But shouldn't the role of a wine cabinet go beyond storage?

Whether making a statement in a living room or discreetly installed in a fitted kitchen, wine cabinets are now capable of sharing space with other focal points in your home, enhancing it with the way of life they evoke, one of fine wine and elegance..

The wine cabinet has become a piece of furniture in its own right and, as a wine cabinet manufacturer, we have drawn on all our expertise to successfully achieve the delicate balance between design and expertise.

To choose your cabinet, decide what your priorities are.

Bringing your vintages, fine wines and best discoveries to their prime.

If you are planning to mature fine wines, **a single-temperature maturing cabinet** is the most suitable.

Prime is the special moment when it is time to drink your wine. When the wine, after the meticulous work of the wine producer, is at its very best.

All the criteria are met: a controlled temperature of 12°C / 54°F, controlled humidity of around 70%, glass doors with highly-effective UV screening, permanent ventilation throughout the cabinet and solid bases to reduce vibration... Nothing is left to chance when it comes to optimal storage of your wine.

Regularly enjoying your wines in optimal drinking conditions.

Lovers of fine wine and food, do you want to celebrate important events in your life? Choose **a wine-serving cabinet** which allows you to store and drink your wine as close as possible to its ideal serving temperature.

There are several types of wine serving cabinets so that each wine can benefit from its ideal temperature:

- multi-temperature wine cabinets with a temperature staggered over the entire height of the cabinet,
- multi-purpose wine cabinets with 2 or 3 separate temperature compartments.

THE SIGNATURE DETAIL

For your peace of mind, we display the actual temperature and humidity values inside the cabinet, not the set values.

Harmonious integration

Fluid lines, elegant transparency and amber lighting allow our different wine cabinet collections to fit perfectly into your interior and enhance the elegance of the room in an understated way. In this way, the space is completely dedicated to conviviality.

Your cabinet is unique

The interior layout of your wine cabinet is completely customisable. A wide range of finishes and shelves allows you to create an elegant setting for your collection regardless of the size and type of bottle you want to store.

The signature detail, the Main du Sommelier bottle support.

Each bottle rests on an individual, sliding, detachable support, called "Main du Sommelier". In addition to protecting your bottles from vibration, thanks to its structure in two materials, Main du Sommelier holds your bottles securely whatever their shape and facilitates access to bottles.

And because your wine collection evolves over time, our storage equipment is modular and can be repositioned throughout the cabinet.

Storing in one same cabinet bottles of Bordeaux, Burgundy, Alsace, Côtes-du-Rhône or Champagne is therefore child's play.

Flush-fitting cabinet

The wine cabinet can overcome any layout constraints, working in perfect harmony with your interior.

Flush-fitting or built-in, wine cabinets enhance living areas from the kitchen to the living room to create convivial spaces.

Compact Collection

No need for big spaces.

Cabinets which fit perfectly into your kitchen and enhance its appearance in an understated way.

Cabinets in the Compact collection fit easily into your kitchen as their dimensions are determined by kitchen designers. They can be displayed with their glass door, or be concealed behind a door which matches your other kitchen units for a minimalist design.

You can choose between two flush-fitting models measuring 82 cm and 178 cm, with capacity for 38 and 164 bottles, subtly displayed with amber lighting.

1 temperature zone

Offer your wine the same storage conditions found in a natural cellar with 1 temperature zone settable from 5 - 20°C / 41 - 68°F. Recommended temperature 12°C / 54°F.

Multi-temperature

Store your wine at an ideal serving temperature with a temperature staggered from 5 - 22°C / 59 - 72°F.

Inspiration Collection

Built-in wine cabinet
to suit your home.

Clean lines, ergonomic curves for flush-fitting in a kitchen or custom-made unit.

Cabinets in the Inspiration collection come with glass or technical doors to blend seamlessly with your interior. Air vents are invisible, handles are concealed, offering a subtle grip.

 You have the choice of three built-in models measuring 81cm, 132cm, 182cm with capacity to store 29 - 89 bottles, displayed by a subtle amber strip of light.

The Inspiration wine cabinet is offered with 2 temperature functions to best meet your requirements.

1 temperature

Settable from 5 - 20°C / 41 - 68°F (recommended temperature 12°C / 54°F), to bring your wine to its prime.

Multi-temperature

Temperature staggered from 5 - 20°C / 41 - 68°C, allowing you to store, in one same cabinet, several wine colours close to their serving temperature.

La Première Collection

All the essential features you
need in a wine cabinet.

Simple wine storage and service.

Flawless ergonomics, an understated design with solid black door or glass door with black frame, white light to display your bottles.

Cabinets in the Première collection are a must-have for all wine lovers.

The multi-purpose beech wood shelves allow you to change or add to your storage according to your requirements. One same shelf can be used in sliding, storage or display mode.

You can choose from 3 cabinet sizes offering capacity for 50 - 230 bottles

1 temperature

For maturing your wine, La Première is offered with 1 temperature zone which can be set from 6 - 18°C / 43 - 65°F. Recommended temperature 12°C / 54°F.

Multi-temperature

La Première offers up to 10 temperature zones over the entire height of the cabinet (from 5 - 20°C / 41 - 68°F). You therefore have, in one same cabinet, all wine colours as close as possible to their serving temperature.

Pure Collection

The versatile wine cabinet.

Specially designed to be multi-purpose, configure the cabinet that best suits your storage requirements and style.

For every cabinet in the Pure collection, it is possible to choose the size, door finish and interior layout.

Our shelves with wooden fronts are fixed to store a maximum number of bottles or sliding to facilitate access to bottles. You can also vary the presentation of your bottles and showcase your best labels with the display shelves.

You can choose between 3 cabinet sizes offering capacity for 68 - 234 bottles

Maturing, cooling, bringing your wine to room temperature...all this is possible.

1 temperature

Settable from 5 - 20°C / 41 - 68°F, ideal for storing your wine over the long term. Recommended temperature 12°C / 54°F.

2 temperature

The Pure 2-temperature model allows you to store up to 110 bottles of red and 60 bottles of white thanks to its 2 separate compartments which can be set from 5 - 11°C / 41 - 52°F and 15 - 20°C / 59 - 68°F respectively.

Multi-temperature

Up to 10 temperature zones (5 - 20°C / 41 - 68°F) over the entire height of the cabinet for storing several wine colours at an ideal serving temperature.

3 temperature

A central storage zone (9- 15°C / 48 - 59°F), an upper service temperature compartment for red wine (15- 22°C / 59 - 72°C)) and a lower cooling compartment for white, rosé wine and champagne.

High-gloss black solid door, full glass door or glass with black frame

Discover Pure in detail on our website eurocave.com

A cabinet with elegant lighting that allows your wine to reach its full potential.

Exclusively dedicated to maturing, cabinets in the Revelation collection allow your wines to mature in the best possible conditions..

For aesthetic appeal, a light strip runs all round the cabinet, surrounding your bottles with a gentle halo of amber light.

The shelves have a glossy black or light oak finish and the bottle cradles at the front allow you the freedom to choose how to display your bottles: horizontally, with the label at the front, on the right, centrally, or on the left. The luxury of changing your mind.

 You can choose from two cabinet sizes offering capacity for 74 - 234 bottles respectively. Only available with one, single temperature, settable from 5 - 20°C / 41 - 68°F. Recommended temperature 12°C / 54°F.

Wine furniture

At the intersection of furniture and wine cellars, discover a unique piece of furniture.

Harmonie is a wine cabinet with perfect proportions. Behind its elegant sideboard design hides an authentic wine cellar.

Its discreet silhouette and shallow depth (480 mm), highlighted by black epoxy metal legs, allow the Harmonie cabinet to blend naturally into various spaces while adding a touch of elegance to interior decor.

The furniture is available in 3 shades: white, light oak, or smoked brown. Then, match the color of the niche, the strips, and the shelf fronts to create a piece that suits you.

Behind its glass or solid doors, Harmonie reveals two temperature-controlled compartments to house your bottles and delight your guests with wines ready for tasting.

Chill your white, rosé, and sparkling wines between 6 and 12°C, and temper your red wines between 12 and 18°C.

Finally, keep an eye on your cellar and control it with a fingertip thanks to the EuroCave Connect app.

Set the temperature for each compartment, change the lighting ambiance, or receive remote alerts.

Connected wine cellar
5-year warranty

A version reserved for architects and designers is available to create custom cladding.

Wine display cabinet

Your bottles are displayed such as many objects of desire.

Royale Collection

An original piece for
an unforgettable wine tasting
experience.

Spectacular and very desirable, be won over by its exceptional charisma.

An outstanding cabinet, Royale is the result of a unique collaboration between artisans, engineers and designers. It was designed to offer you the very best in terms of design and performance.

Mature your Romanée Conti, Château Margaux, Clos Vougeot thanks to completely independent temperature (12°C / 54°F) and humidity (70%) control – Maturing mode.

Store your champagne, red and white wines at an ideal serving temperature, allowing your guests to enjoy special moments around wine – Serving model, settable from 6 - 18°C / 43 - 65°F.

The Royale wine cabinet single-handedly redefines the contours of a room: imposing stature, mineral or wood finish, full glass door, amber lighting on all the shelves: vintages beautifully displayed.

10-year warranty

Wine bar

For special moments.

Storage of wine at serving temperature
and preservation of open bottles.
Just enjoy the moment.

A wine bar with elegant lines and compact dimensions, Tête à Tête is a stylish accessory for the home.

Tête à Tête, which doubles up as a piece of occasional furniture, is an elegant addition to any interior thanks to its compact dimensions and attention to detail – glass top cover, clean lines and subtle lighting. Installed in a custom-made unit or free standing at the end of a sofa, it ensures that your wine is always ready for drinking.

With capacity for up to 12 bottles, Tête à Tête allows you to store and serve your best vintages even after opening, at an ideal temperature (settable from 6 - 22°C / 43 - 72°F). This wine bar ensures that wine lovers can protect 2 bottles from oxidation, for up to 10 days* thanks to its vacuum sealing system.

Champagne cabinet

Sparkling symbol of the French way of life, this cabinet is dedicated to effectively displaying and storing champagne.

Champagne, the go-to drink for celebrations, must be stored at the correct temperature before serving and above all it must be stored in a cabinet that will display it beautifully.

The champagne cabinet sets new standards for serving and displaying champagne. Its unique ice bucket shelf comprises a turntable on top of which stylish bottle supports in chrome-plated steel elegantly hold the bottles.

The cabinet's sliding shelves are designed to store all types of champagne bottle. A bold homage to the originality of champagne houses and their heritage.

With its red, blue or amber lighting, the cabinet illuminates the room in which it is installed and fits in perfectly with any decor. The final detail, custom-made iridescent leather cladding. It subtly covers the areas of the shelves the bottles rest on.

Available in small or large models, the champagne cabinet can store 22 - 91 bottles at a single temperature settable from 5 - 12°C / 41 - 54°F.

Our world
Cigar humididor

The art of storing cigars.

Just like drinking a good wine, smoking a cigar is a special moment. But to appreciate a cigar, it must be stored in ideal conditions so that the tobacco leaves release all their flavours. The cigar lover needs an essential item to develop his passion: a cigar humidior.

The cigar humidior is just like a wine cabinet. It must have all the criteria required by cigar lovers for storing and making the most of their collection:

- Humidity of 60% - 75%,
- A constant temperature of 15°C - 20°C,
- Suitable storage for the original cigar boxes or for individual cigars.

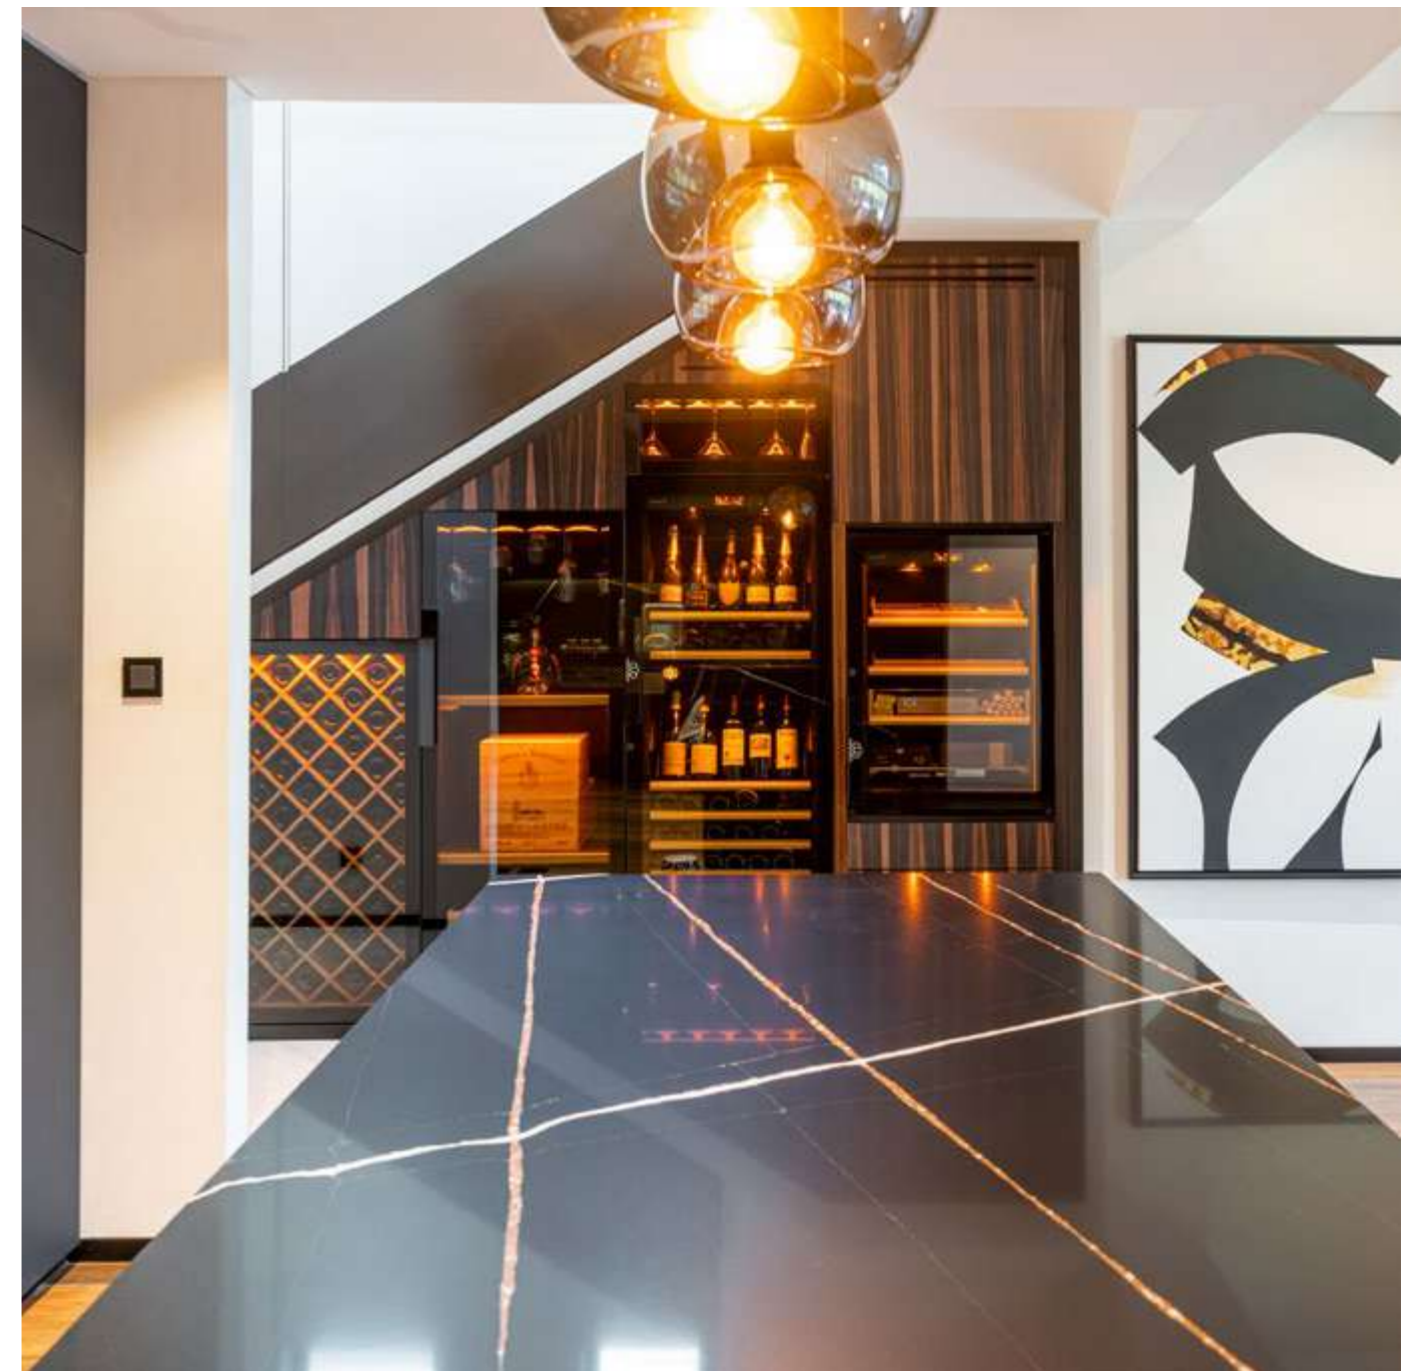

The humidior plays an important role in the cigar experience and is part of the cigar smoking ritual.

Ideally placed in your living room, it will allow you to make the most of your cigars.

Discover the cigar humidior in detail on our website eurocave.com

Cigar lovers know that the container is as important as the contents, so that when they come to smoke the cigar, it is a moment of pure pleasure.

Stand out with a cigar humidior featuring a glass door and amber lighting, allowing you to keep an eye on your collection without compromising its preservation.

The cigars are stored in an optimal environment: a temperature that can be set from 15°C to 20°C / 59 - 68°F and a humidity control system.

Thanks to its system of storage drawers and sliding presentation shelves, handling your cigars is a real pleasure.

With capacity for 700 - 1000 cigars, your collection can grow over the years as you make new discoveries.
