

 **iFAVINE®**

 **iSommelier**

Smart Decanter

What is iSommelier

iSommelier is a smart decanter with a global patent. iSommelier uses a molecular filter technology to isolate oxygen from the air, and filters 90% purified oxygen throughout the wine in our unique carafe. iSommelier effectively reduces trace of methanol, sulfur dioxide, and other harmful substances in the wine. The decanting process is more efficient, more thorough, and healthier.

With an efficient and intelligent decanting process, iSommelier maximizes the level of aroma and flavor, and brings the potential of each wine to reach its peak status.

iSommelier Pro

EFFICIENT DECANTING, ENHANCED TASTE

Highly concentrated and purified oxygen comes in contact with the full body of the wine more evenly and makes the aeration more efficient. This reduces traditionally required long decanting times. The efficient and convenient aeration process suits the rapid pace of modern life. Enabling you to decant in minutes not hours.

iFAVINE APP AND NETWORK

iFAVINE Network includes a substantial amount of wine and winery information plus recommendations from professionals on decanting times. Users can understand more about their wine by accessing the iFAVINE Network through the APP. Communication between winemakers and consumers will be improved, creating a greater experience for everyone. The APP also allows users to conveniently control the iSommelier wirelessly.

TOUCH CONTROL PANEL

Allows you to set your favorite decanting times for convenient use in order to suit your palate. There are also touch buttons to start, pause and stop the control of your decanting progress.

iSommelier

DECANT YOUR WINE IN MINUTES NOT HOURS

iSommelier has a molecular air filtration system producing 90% pure oxygen which is then passed through the body of the wine. This achieves an accelerated aging effect within minutes. The wine becomes smoother with enhanced aromas and flavors.

EASY OPERATION

Using the control dial, set the appropriate decanting time. You can start, pause and stop the high efficiency decanting process at your fingertips.

PORTABLE (Rechargeable battery sold separately)

Rechargeable battery offers you the convenience to take an iSommelier everywhere you choose without having to connect to a power. iSommelier gives you up to an hour of operating time.
